

Mitsubishi Electric
Projected Capacitive Touch Panel (PCAP)

Mitsubishi Electric's new state of the Art PCAP Generation is beyond the features of other suppliers. Due to own PCAP development you can find additional benefits like water on surface use, strong glove usage, wide temperature range and all in one production at Mitsubishi High Tec TFT factory in Japan. Optical performance is excellent as sensing electrode is invisible.

The model range will be 6.5", 8.4", 10.4", 12.1" and 15".

Additional features are:

- Work through 2.8mm protection glass
- No need to calibrate
- Optical bonding available
- Built-in- controller
- Total Support (LCD + PCAP + Controller + Software) with warranty
- Please ask for more details or a demonstration!
